## Julie Hart

### Director of Operations

Following many years in both Accounting and Law Costing, I took the bold step to change my career path to work within the Recruitment Industry. Over the past 18 years I have worked across several Recruitment arenas, specifically Healthcare, Education, SEN and Disability Welfare. During this time, I have worked within the Public, Private and Charity sectors and worked integrally with several governing authorities, including: CQC, NHS, DWP, SFA and Ofsted.

## Meet the Team

Having joined MCL Resourcing early 2018, it has been an exciting time with the introduction of a dedicated Healthcare and Commercial team. To find out more and meet the team, why not pop into 81 Eastbank Street, Southport, PR8 1DG or give the team a call on 01704 512906 we look forward to hearing from you.

#### Placement Manager:

Christine Howard

#### Placement Coordinator:

Ellette Roberts-Goulden

#### Office Administrator:

Gemma Godkin

#### Recruitment Resourcer:

Lucy Irwin

#### Commercial Client Relationship Manager :

Julia Trevor

## Workforce Management Software

This month we have implemented a new booking system called PARiM. It is the leading professional staff management solution used by over 50,000 people everyday.

Features include employee scheduling, time and attendance tracking, HR

Management and shift and availability selection. It is more refined than anything we have had previously and it is easy to use.

We are looking forward to introducing PARiM to all our staff.

## Recertification

We successfully gained recertification to ISO 22301 Societal security, Business continuity management in May 2018. As an organisation we continually improve a documented management system in order to protect against, reduce the likelihood of occurrence, prepare and respond, and recover from any disruptive incidents when they arise.

We are now working towards the new standard ISO 45001 which was released in March this year which will replace ISO 18001. As an already certified organisation to OHSAS 18001 we will have three years to transition with the new ISO 45001 standard but are well underway to meet this new standard.
